Comment by Marinko Došen, President of the Management Board

We present you the results of the AD Plastik Group's business in 2021, very challenging and demanding year, and according to many, one of the most difficult ones in the history of the automotive industry. Although the very beginning of the year showed positive signs and indicated the recovery of the market, the global crisis with the lack of semiconductors significantly affected the sales of new cars. Namely, due to the crisis, car manufacturers failed to meet the needs of the market and deliver the required quantities. Disruptions in production processes have affected the entire supply chain of the automotive industry, including our business.

In these rather difficult circumstances, we generated the Group's operating revenue in the amount of HRK 1.14 billion, which was by 6.8 percent lower than a year earlier. EBITDA amounted to HRK 123.64 million and was lower by 25.5 percent, while net profit decreased by 52.7 percent compared to 2020 and amounted to HRK 22.21 million. At the same time, the intensity of the crisis was somewhat lower in the Russian

market, so our Russian factories achieved revenue growth of 13 percent.

The biggest challenges for our business operations in the past period have been the adaptations to frequent and uncertain changes in the operational plans of our customers, but despite this we have maintained our position and reputation as a reliable and quality supplier. We have adapted to their changes and at no point were our deliveries compromised. In addition to disruptions in the supply chain, last year was marked also by a significant increase in the prices of materials, raw materials, transport and energy sources, which continues also in this period. By open price calculation and alignment with most of our customers, the impact on business has been reduced, but we are still primarily focused on maintaining financial stability and sustainability of business.

Unlike production, sales and project activities proceeded unhindered, so in 2021 we sealed new deals worth more than EUR 150 million. We have also sealed deals on several very important

development projects, thus strengthening our position as a development supplier. We have been working intensively on sales and development activities and the realization of 37 active development projects. In Russia, we have been actively preparing for the start of serial production of new vehicles and the realization of one of the largest contracted projects in that market.

The development activities of car manufacturers are in full swing and the entire industry has been actively preparing for the end of the crisis and a new rise. Although another very demanding period is ahead of us and there is no room for relaxation, I am sure that we will successfully cope with this rather difficult crisis. We are ready for new challenges, and we will breathe life into the better, brighter and more sustainable future of the automotive industry, which will surely come.

Financial results for 2021

AD Plastik Group is comprised of the following companies during the reporting period:

- AD Plastik d.d., Croatia
 - AO AD Plastik Togliatti, Russia
 - ZAO AD Plastik Kaluga, Russia
 - AD Plastik Tisza Kft., Hungary
 - ADP d.o.o., Serbia
 - AD Plastik d.o.o., Slovenia
- (hereinafter: AD Plastik Group)

Signs of the recovery of the automotive industry at the beginning of the 2021 have been slowed down during the year due to the lack of semiconductors in the global market. That is the crisis that has affected production and consequently the sales of new cars, especially in the second half of the year. The Group's production sites have been adapting to uncertain and constant changes in customers' operational plans. However, due to the inability to plan, prepare and respond adequately in such short time intervals, fluctuations in orders have affected the company's revenue and profitability. At the same time, the global economy, as well as the AD Plastik Group, has been facing additional market challenges such as supply chain disruptions and rise in material and energy sources prices.

The Group's operating revenue for 2021 amounted to HRK 1,135.57 million and was by 6.8 percent lower compared to 2020, while in the parent company it was by 13.4 percent lower and amounted to HRK 755 million. Although market indicators were significantly more

favorable in the first half of the year, in the second half movements changed direction due to increasingly pronounced disruptions in the supply of semiconductors. Decreased production and a shortage of vehicles affected the expected trends in the number of newly registered cars in the European market. At the same time, these trends are more favorable in the Russian market, and the Group achieved revenue growth of 13 percent in Russia.

EBITDA in the reporting period decreased by 25.5 percent at the Group level and amounted to HRK 123.64 million, while in the parent company it was lower by 37.7 percent and amounted to HRK 73.80 million. The Group's net profit decreased by 52.7 percent compared to 2020 and amounted to HRK 22.21 million, while in the parent company it was lower by 77.2 percent and amounted to HRK 15.64 million. At the same time, it should be noted that in the comparable year of 2020, there were significant one-off positive effects from the sale of non-operating assets and used government grants in the amount

of HRK 32.9 million at the Group level and HRK 30.3 million at the parent company.

Lower EBITDA affected the Group's and the parent company's net profit trend, with the additional impact of the lower profit from the affiliated Romanian company on the Group's result, i.e. lower income from its dividend which affected the parent company's net profit. The movement of the Russian ruble exchange rate in 2021 had a positive effect on the company's business results.

The reporting period was extremely challenging and demanding for the company's business operations. Despite expectations of a shorter duration of problems with semi-conductors, the crisis in their

supply continues also in 2022. However, gradual stabilization is expected in the second half of the year, which should have a positive impact on new car sales growth. The challenges posed by the pandemic, market disruptions and rise in energy sources and raw material prices will be present in the upcoming period too. AD Plastik Group has been adapting to the market situation, primarily taking into account the health and safety of its employees, maintaining financial stability and business sustainability.

In the observed period, new deals worth EUR 152 million were sealed for the European and Russian markets, which is evidence of the automotive industry's intensive preparations for the end of the crisis. The

development activities of car manufacturers are in full swing, and AD Plastik Group has been successfully following them, by working intensively on its sales and project activities in order to readily welcome the end of the crisis. In 2021, preparatory activities were carried out for new sealed deals, and 2022 is operationally focused on the successful realization of 37 active development projects and the start of serial production of new vehicles in the Russian market.

The strengthening of the Russian ruble exchange rate in the reporting period, along with lower financing costs, had a favorable effect on the Group's net financial result. The lower dividend income from the affiliated Romanian

company affected the results of the parent company which were less favorable compared to the year before. In the reporting and comparative period, exchange rate differences within and outside the Group are presented on a net basis.

FINANCIAL POSITION

The Group's net financial debt as of December 31, 2021 amounted to HRK 358.8 million, with an NFD/EBITDA ratio of 2.9. In the parent company, it amounted to HRK 325.6 million, and the NFD/EBITDA ratio of 4.41 was achieved. Lower EBITDA had the greatest impact on the achieved indicator movement. In the reporting period, the company duly repaid all loan liabilities and provided additional liquidity through HBOR's program for permanent working capital on extremely favorable terms.

Indebtedness ratio was improved and as of December 31, 2021 it was 0.43 at the Group level, compared to 0.44 at the end of 2020. In the parent company it was the same as at the end of last year and amounted to 0.39. In the observed period, a return on equity (ROE) of 2.6 percent was achieved at the Group level, and 2 percent in the parent company.

As of December 31, 2021, Group had HRK 30.2 million in cash on its account as well as unused short-term credit lines in the amount of over HRK 70 million.

Operating revenue per sales markets

- Revenue of AD Plastik Group in EU and Serbian markets has decreased by 12.40 per cent

- Revenue of AD Plastik Group in Russia has increased by 12.76 per cent

EU AND SERBIAN MARKETS

In 2021, AD Plastik Group generated revenue of HRK 830.3 million in these markets, which is 73 percent of the Group's total revenue. Compared to 2020, revenue was lower by 12 percent and its movement is influenced by the lack of semiconductors in the market.

Market disruptions have affected the movement of the number of newly registered cars, which in 2021 decreased by 2.4 percent compared to the previous year. Although sales increased in the first half of the year, decline in the second half of the year, due to the lack of cars in the market, completely changed the overall result. Thus, in 2021, 9.7 million new vehicles were registered, which is a decline of 2.4 percent compared to 2020. The largest markets in the EU, however, recorded an increase in sales, except for the German market, which recorded a decline of 10.1 percent. Italy thus recorded a growth of 5.5 percent, Spain 1.1 percent and France 0.5 percent.

The Volkswagen Group still holds the largest market share of 25.1 percent in the reporting period and recorded a decline in sales of 4.8 percent. Stellantis with a 21.9 percent share recorded a decline of 2.1 percent, while the Renault Group recorded a decline in sales of 10.2 percent and has a 10.6 percent market share.

According to ACEA forecasts, if stabilization in the supply of semiconductors is achieved, the number of newly registered cars is expected to increase by 7.9 percent in 2022.

In the reporting period, new deals worth EUR 79.9 million were sealed for the Stellantis Group in the European market.

RUSSIAN MARKET

Operating revenue in the Russian market increased by 13 percent in 2021 and amounted to HRK 305.3 million. In the reporting period, it accounted for 27 percent of the Group's total revenue, representing a five percent increase compared to the previous year. Russian companies fully generate their revenue in the Russian market, and the semiconductor crisis affected that market with somewhat less intensity.

1.7 million new cars were registered in the Russian market in 2021, which is a growth of 4.3 percent compared to 2020. Despite negative developments in the second half of the year due to the lack of semiconductors and other market disruptions, AEB AMC predicts a slight market recovery with sales growth of 3.3 percent in 2022.

The Group's most significant customer in this market is the Renault-Nissan-Mitsubishi Alliance, with the largest market share of 33.8 percent, which recorded a 3.2 percent decline in the observed period. The Volkswagen Group has an increasingly significant share in the company's customer portfolio in Russia. Its market share in that market is 11.9 percent, and in 2021 it recorded a decline of 8.2 percent.

In the reporting period, new deals worth EUR 71.8 million were sealed for these customers.

ADPL is among the ten most liquid issues in 2021 in the domestic capital market, with a turnover of HRK 48,3 million, which is 2.8 percent of the total turnover of shares at the Zagreb Stock Exchange. The price of the ADPL share increased by 3.4 percent, compared to the end of last year, and as of December 31, 2021 it amounted to HRK 165.5. The highest price in this period was HRK 198, while the lowest price was HRK 148.

The movement of the share price was significantly affected by the semiconductor crisis, but most shares in the automotive industry recorded an increase in prices compared to last year. Despite numerous uncertainties and challenges during the year, capital markets have been growing thanks to the continued favorable monetary policy of the world's leading banks and the strong recovery of the companies' business operations in global markets. For the fourth year in a row, US markets have been outperforming all other major global capital markets, with the S&P 500 index growth of 25 percent.

Some stabilization was also recorded in the domestic capital market, with a significant strengthening of almost all indexes. Although the market looked quite diverse during the year, Crobex recorded growth of 19.6 percent. The turnover of shares within the book of offers at the Zagreb Stock Exchange is a quarter lower than a year earlier, and the total turnover is ultimately almost by 19 percent lower.

By the decision of the General Assembly from March and July, in 2021 a dividend in the total amount of HRK 66.3 million was paid. HRK 8 per share was paid from 2019 retained earnings, and HRK 8 from 2020 earnings. Taking into account the last price at the end of the reporting period, the dividend yield is 9.7 percent.

As of December 31, 2021, the share was traded at a P/E of 30.9. The lower generated profit affected the decline in earnings per share (EPS),

which amounted to HRK 5.4, compared to HRK 11.4 a year earlier. Return on equity (ROE) is 2.6 percent, compared to 5.5 percent a year earlier.

Alternative performance measures

ADDENDUM 1

In addition to the financial performance measures defined by International Financial Reporting Standards (IFRS), AD Plastik Group also uses certain alternative performance measures in its reports, considering them useful for business performance analysis for investors. Alternative performance measures show a comparative periods so that the company's results can be compared over different periods.

EBITDA and EBITDA margin

EBITDA (Earnings before Interest, Taxes, Depreciation and Amortization) represents the operating profit (operating revenue minus operating expenses) increased by amortization of tangible and intangible assets. The company also presents an EBITDA margin that represents a percentage of EBITDA relative to operating revenue.

NET profit margin

It is calculated by the ratio of realized net profit and operating revenue. The company uses this measure to track its profitability relative to operating revenue.

NET debt and net debt to EBITDA

Net debt represents the sum of short-term and long-term liabilities to banks and short-term and long-term loans to non-banking companies, minus cash and cash equivalents. AD Plastik Group uses the ratio of net debt to EBITDA as an

indicator of financial stability and the company's ability to repay its financial obligations. When calculating the indicators on a quarterly basis, the EBITDA realized in the last four quarters is taken into account.

ROE

This measure is used to monitor the realized return on equity. It is calculated on an annual and quarterly basis. When calculating the indicators on an annual basis, the ratio is the net profit of the current period and the average value of equity (the average value of equity at the end of the reporting period and equity at the beginning of the reporting period). At the quarterly level, it is calculated by the ratio of net profit for the last four quarters and the average value of equity (average value of equity at the end of the reporting period and equity at the end of the same period of the previous year).

Capex

Capital investments are indirect cash flow position and they are related to payments for tangible and intangible assets. This measure is used as an indicator of the use of funds to achieve future economic flows and ensure the distribution of funds in accordance with the Group's strategy.

Indebtedness ratio

The indebtedness ratio is the ratio of total liabilities to total assets. This measure is used to monitor the company's financial risk in terms of growth of liabilities in relation to assets.

Market capitalization

Market capitalization is the total market value of the company, and it is calculated as the product of the total number of shares and the last share price on the day of the reporting period.

	31 Dec 2020	31 Dec 2021
Last price in the period (HRK)	160	165.5
Number of shares (000)	4,200	4,200
Market capitalization (in HRK 000)	671,933	695,031

EPS and P/E

These measures are used so that investors can analyze the value of the share. Earnings per share (EPS) are calculated by dividing net profit by the weighted average number of shares. The quarterly calculation uses the net profit realized in the last four quarters.

	31 Dec 2020	31 Dec 2021
Net profit of the period (in HRK 000)	46,929	22,210
Average weighted number of shares (000)	4,131	4,143
EPS (HRK)	11.36	5.36

P/E is the ratio of price to earnings per share (EPS). The price represents the share price on the last day of the reporting period, and in the quarterly calculation, net profit represents the realized profit in the last four quarters.
